International Journal of
PARALLEL PROGRAMMING

Vol. 29, Number 1 February 2001

CONTENTS

Special Issue: Parallel Architectures and Compilation Techniques, Part II
Guest Editor: Paraskevas Evripidou

Introduction 1
Paraskevas Evripidou

The Need for Fast Communication in Hardware-Based Speculative Chip Multiprocessors 3
Venkata Krishnan and Josep Torrellas

An Exploration of Instruction Fetch Requirement in Out-of-Order Superscalar Processors 35
Pierre Michaud, André Seznec, and Stéphan Jourdan

Dynamic Code Partitioning for Clustered Architectures 59
Ramon Canal, Joan-Manuel Parcerisa, and Antonio González

Selective Branch Inversion: Confidence Estimation for Branch Predictors 81
Artur Klauser, Srilatha Manne, and Dirk Grunwald

International Journal of
PARALLEL PROGRAMMING

Vol. 29, Number 2 **April 2001**

CONTENTS

Exploring the Interaction between Java's Implicitly Thrown Exceptions and Instruction Scheduling 111
Matthew Arnold, Michael Hsiao, Ulrich Kremer, and Barbara G. Ryder

Static Single Assignment Form for Message-Passing Programs 139
Dhruva R. Chakrabarti and Prithviraj Banerjee

Unified Interprocedural Parallelism Detection 185
Jay P. Hoeflinger, Yunheung Paek, and Kwang Yi

International Journal of
PARALLEL PROGRAMMING

Vol. 29, Number 3 June 2001

CONTENTS

Improving Memory Hierarchy Performance for Irregular Applications Using Data and Computation Reorderings 217
John Mellor-Crummey, David Whalley, and Ken Kennedy

The Architectural and Operating System Implications on the Performance of Synchronization on ccNUMA Multiprocessors 249
Dimitrios S. Nikolopoulos and Theodore S. Papatheodorou

A Comparison of MPI, SHMEM and Cache-Coherent Shared Address Space Programming Models on a Tightly-Coupled Multiprocessors 283
Hongzhang Shan and Jaswinder Pal Singh

Data-Centric Transformations for Locality Enhancement 319
Induprakas Kodukula and Keshav Pingali

International Journal of
PARALLEL PROGRAMMING

Vol. 29, Number 4 August 2001

CONTENTS

Evaluation of Neural and Genetic Algorithms for Synthesizing Parallel Storage Schemes 365
Mayez Al-Mouhamed and Hussam Abu-Haimed

Support for Implementation of Evolutionary Concurrent Systems 401
Raju Pandey and James C. Browne

Enhancing Functional and Irregular Parallelism: Stateful Functions and their Semantics 433
Isabelle Attali, Denis Caromel, Yung-Syau Chen, Jean-Luc Gaudiot, and Andrew L. Wendelborn

International Journal of
PARALLEL PROGRAMMING

Vol. 29, Number 5 **October 2001**

CONTENTS

Guest Editor's Introduction 461

Fast Greedy Weighted Fusion 463
Ken Kennedy

Synthesizing Transformations for Locality Enhancement of Imperfectly-Nested Loop Nests 495
Nawaaz Ahmed, Nikolay Mateev, and Keshav Pingali

Optimized Unrolling of Nested Loops 549
Vivek Sarkar

International Journal of
PARALLEL PROGRAMMING

Vol. 29, Number 6 December 2001

CONTENTS

Y-Invalidate: A New Protocol for Implementing Weak Consistency in DSM Systems 583
Yosi Ben-Asher and Dimitry Podvolny

Two-Phase Barrier: A Synchronization Primitive for Improving the Processor Utilization 607
Inbum Jung, Jongwoong Hyun, Joonwon Lee, and Joongsoo Ma
